James Churchward | Cosmic Forces of Mu | Volume Two | True to original copy of the 1935 edition | Mu, a legendary continent that disappeared in the ocean waves ages ago, stretched, according to Churchward, "from somewhere north of Hawaii to the south to Fiji and the Easter Islands". Mu was the site of the Garden of Eden

and home to 64,000,000 people - known as the Naacals. Its civilisation was very advanced and the ancient civilisations of India, Babylon, Persia, Egypt and the Mayans were merely the decayed remains of its colonies. This volume, first published 1935, is dedicated to the study of cosmic forces of Mu: "My first book on the Cosmic Forces related especially to the Primary Forces which are governing the movements of all celestial bodies throughout the universe. That section was selected for a commencement, as it enabled me to show the origin of these Forces and the manner in which they are working. This volume is devoted to the Cosmic Forces as they affect the earth. In my first volume on the Cosmic Forces I ended with the addenda: a synopsis of "The Birth of the Earth." I shall commence this volume by giving a full and illustrated chapter on "The Birth of the Earth." The illustrations make it more comprehensible. The earth is only a tiny twig on a big branch of an immense tree. Therefore she does not get her forces direct from the Source of the Cosmic Forces. What she requires is portioned out to her by her Sun. The Sun is her transmitter, so that the Earthly Cosmic Forces are of a secondary nature. The Sun supplies the earth with her portion as arranged by Nature. She receives this volume, rearranges it and passes it out through her hard crust to supply the requirements of Nature..."
