REU-Coin (REU) is the best Crypto play of May 2022. This highly undervalued token on the Ethereum network is in the final month of presale, which began in November.

My most recent Crypto plays include going all-in on DogeBonk (DOBO) on Halloween 2021, and Cyop Protocol (CYOP) on New Year's Eve of 2021.

Both DogeBonk and Cyop pumped massively, but in the end, the fundamentals were not there. They were not long-term holds and although I sold in the green, I was far from selling the top.

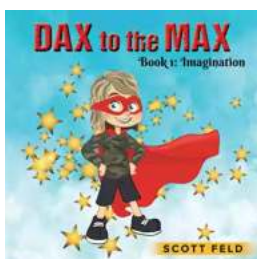

My goal is to find a long-term hold at an early entry point.

As of writing this on May 1, 2022-- I feel I've found it.
