Why are some battles remembered more than others? Surprisingly, it is not just size that matters, nor the number of dead, the decisiveness of battles or their effects on communities and civilisations. It is their political afterlife the multiple meanings and political uses attributed to them that determines their fame. This ground-breaking series goes well beyond military history by exploring the transformation of battles into sites of memory and meaning. Cast into epic myths

of the fight of Good against Evil, of punishment for decadence or reward for virtue, of the birth of a nation or the collective assertion against a tyrant, the defense of Civilisation against the Barbarians, Christendom against the Infidel, particular battles have acquired fame beyond their immediate contemporaneous relevance. The great battles of modern history examined in this second volume range from the defeat of the Armada and the relief of Vienna, to Chatham, Culloden, Waterloo, Gettysburg, the Somme and Stalingrad. In each chapter, the historical events surrounding a battle form the backdrop for multiple later interpretations, which, consciously or unconsciously, carry political agendas, some for further bloodshed and sacrifice, but others for the more recent and laudable phenomenon of reconciliation over the graves of the dead.
