## **Dark Days at Disneyland**

A rogue Imagineer enlists a former Jungle Cruise skipper in his mad scheme to track down the name tags of former Disneyland cast members. Encoded within those name tags: the technology for "audio-eugenics", the creation of perfect bio-engineered cast members who never tire and never age.

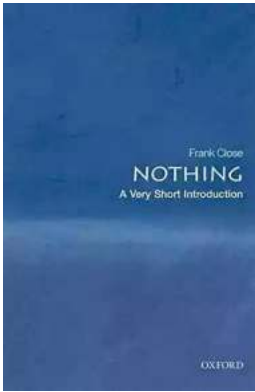

One of Walt Disney's engineering marvels was audio-animatronics: lifelike figures capable of movement and speech that populate such iconic attractions as Pirates of the Caribbean, "it's a small world", and Hall of Presidents. But for all their realism, they're still just machines.

What if the technology could be taken even further. From audio-animatronics to audio-eugenics, a synthesis of machine and human DNA, in the pursuit of an even more immersive theme park, where the cast members are happy around the clock, and where each cast member is not chosen for but rather designed with the "Disney Look". Perfect Jungle Cruise skippers, perfect Haunted Mansion butlers, perfect everyone, everywhere, and no one draws a paycheck.

Whether this great, big, bio-mechanical tomorrow will happen is in the hands of Dave, a former Jungle Cruise skipper, whose hit list of cast members takes him across the country, and through the decades, from the 1960s to the present.

Treasure of the Ten Tags is more than just an action-adventure with a Disney twist; it's also a behind-the-scenes look at Disneyland, seen through the eyes of cast members employed as characters, ride operators, street sweepers, parking lot attendants, and even can-can dancers at the Golden Horseshoe Revue.
